

The Rise of Craft Beer

It's never been a better time for quality ale in the UK & Ireland. Across the country there has been a revival in artisan brewing. Beer has been reinventing itself along with the method of service. More and more bars are to serve these ales in sampler format, by the can, bottle and reduced pint sizes.

Traditional glasses, such as the Britannia Dimple Tankard, are now back in vogue and bars are now looking move and move to different styles in order to match the glass to the needs of the beverage.

Our BEER LEGEND collection has been designed to complement this trend by offering a series of glasses in different capacities with diverse benefits.

Short fuller glasses are suited to darker beverages, taller slender glasses are excellent with lighter and fruiter beverages, we have something for everyone.

Tasting

The diversity of beer, ale, lagers, stouts, ciders and so on is huge and we now have greater expectations on how the flavours are expressed. Like wine, each of these beverages has their own personality. We recommend you try different beers in different glasses, you will be surprised at the results. Here are a few of our favourites, but please look at our Beer Legend, stemmed beer and premium wine ranges for further inspiration.

The Headstart system from Arcoroc is designed to stimulate the trapped CO2 bubbles in carbonated drinks. By releasing these bubbles the beverage takes on a more attractive appearance and the Headstart system then helps maintain the appearance for longer. Not only do the bubbles make the beverage more attractive, but drinks such as lager will maintain their head for longer.

Head Booster is the latest form of nucleation that is designed to offer the perfect mix between head life, beverage wastage and visual appeal.

The laser etched inner surface of each glass stimulates the CO2 found in carbonated drinks and releases it to create a healthier looking beverage with a stronger visual appeal.

All of the glasses within the Head Booster range are also FULLY TOUGHENED for an increased lifespan.

HEAD – ON – IT

Head-On-It uses a clever form of paint nucleation which is slightly more aggressive than the Headstart version. Head-On-It is designed to maintain the healthy appearance of a foam head of the drink for up to 10 times longer than normal glassware. A further benefit is that all Head-On-It glasses are Fully Toughened.

HEAD FIRST

The Head First range of premium beer glasses use paint nucleation to create and maintain the beer head. With their heavy stems and elegant shapes, these glasses combine quality with functionality.
