The Krysta™ barware items in the Aska range bear all the distinctive elements of contemporary high-end tumblers. An unusual conical shape, a heavy base, and thin sides create sophistication. The 38 cl tumbler is available plain or in two versions with a structured base. One is in the shape of a wave and the other features a 'brushed concrete' effect' that pairs with the brightness of the crystalline. This reflection will surprise your customers, who are always looking for innovations.

Design for the growing premium spirits market ASKA TATTRAS & THAR bring added interest in the form of a textured base feature.

ASKA TATTRAS features a concrete effect that, whilst subtle, brings a feeling and texture to the hand.

ASKA THAR features a wave embossment to the underside of the base making the tumblers interesting to hold.

The Primary collection has been designed to be used as a water glass, stemless wine, dessert tumbler or simply as a mixer & spirit glass.

The Arpege collection has mastered the art of contrast. These glasses embody contemporary lines contrasted with retro-styled curled handles. These curls stand out in the light yet fade away when the glasses are filled. Enhanced by the purity and brilliance of Krysta, these curls transform the tumblers into artistic pieces to embellish your table.

FUSION is a superb new 'mini range' of chic cocktail and over capacity tumblers. The spirit was taken from the modern bars of today, bars that now create drinks for a complete new audience of dynamic customers.

BROADWAY is a crystal design from our achieves. The clever cuts play with the light and create a feeling of yesteryear. The elegant shot glass is perfect for premium spirits or even a amuse-bouche.

SUPER TOUGH

Our SUPER TOUGH Fully Toughened/ Tempered tumbler ranges offer an increased life span, up to 15 times longer. They also bring increased strength, thermal shock resistance and a safer breakage pattern, all of which bring true added value to any venue requiring a performance product.

=

- Savings in terms of budget and restocking costs: a fully toughened glass can be up to 5 times more resistant than an item that has not undergone any specific treatment process.

- Fully toughened products are resistant to variations in temperature of 135°C: they can thus be removed from the oven (or from a salamander) and placed directly in cold water without the risk of breakage.

- Completely safe for service: when a shock or series of shocks manages to rupture the exterior shell of the fully toughened glass, the resulting broken glass shards are not sharp to the touch.
